## EXPLANATORY NOTES

In this report, throughout, the statements of quantities and values are based on the declarations of importers (import entries) and exporters (export entries) as subsequently checked by Customs officials.

Weight, where shown, is the net weight of the goods, excluding the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

*Imports: Valuation*—"Imports" means "Imports for Consumption." "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the possession of the importer and that duty has been paid on that portion liable for duty.

The value of imported merchandise is the fair market value or the price thereof when sold for home consumption in the principal markets of the country whence and at the time when the same were exported directly to Canada. The "price" and "value" of the goods in every case are stated as in condition packed ready for shipment, the fair value being shown in the currency of the country of export, and the selling price to the purchaser in Canada shown in the actual currency in which the goods were purchased. In the case of goods that are the manufacture or produce of a foreign country the currency of which is substantially depreciated, the value stated is the value that would be placed on similar goods manufactured or purchased in the United Kingdom and imported from that country, if such similar goods are made or produced there. If similar goods are not made or produced in the United Kingdom, the value stated is the value of similar goods made or produced in any European country the currency of which is not substantially depreciated.

*Canadian Exports: Valuation*—"Canadian Produce" exported includes Canadian products or manufacture, also exports of commodities of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials.

The value of exports of Canadian merchandise is the actual cost or the value at the time of exportation at the points in Canada whence originally shipped.

*Foreign Exports: Valuation*—"Foreign Produce" exported consists of foreign merchandise which had been imported (entered for home consumption).

The value of such commodities is the actual cost of such goods.

*Countries to Which Trade is Credited.*—Imports are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, save in the course of transshipment or transfer from one conveyance to another.

The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

Exports are credited to the country of final destination, i.e., the country to which they are consigned, whether that country possesses a seaboard or not. The country of final destination is the country to which goods exported from Canada are intended to pass, without interruption of transit save in the course of transshipment or transfer from one means of conveyance to another.

*Ports*—In this report the tables of imports and exports at the several ports of entry indicate that merchandise of the value stated was entered inwards or passed outwards at the ports mentioned, but do not imply that the imports were all for consumption at such ports or that the exports originated there.

---

The initials N.O.P. mean "not otherwise provided for."

---

*Electrical Energy*—The values of electrical energy imported and exported are included in the totals of trade as from April 1, 1928.

## NOTES EXPLICATIVES

Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation) subséquentement vérifiées par les fonctionnaires des douanes.

Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc., n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

L'expression «ton.» signifie 2,000 livres et «qtx» (ou quintal) 100 livres avoir-du-poids. Lorsque l'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

*Importations: Evaluation*—«Importations» signifie «importations pour la consommation.» «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur, qui a payé les droits sur telle partie imposable des ces marchandises.

La valeur des marchandises importées est le prix réel et exact qu'elles commandent sur les principaux marchés du pays d'où elles viennent, au moment de leur exportation directe au Canada. Le «prix» et la «valeur» des marchandises sont invariablement établis après leur emballage, lorsqu'elles sont prêtes à être expédiées, leur valeur étant indiquée en monnaie du pays exportateur et le prix de vente à l'acheteur canadien indiqué en la monnaie qui a servi de base à cet achat. Lorsqu'il s'agit de marchandises provenant d'un pays étranger dont la devise monétaire est substantiellement dépréciée, la valeur indiquée est analogue à celle des marchandises similaires fabriquées ou achetées au Royaume-Uni et importées de ce pays, s'il fabrique ou produit des marchandises similaires. Dans le cas contraire, on adopte la valeur de marchandises similaires fabriquées ou produites dans un pays européen quelconque dont la devise monétaire n'est pas substantiellement dépréciée.

*Exportations: Evaluation*—L'expression «produits canadiens» couvre non seulement les produits du sol ou des manufactures du Canada mais aussi les produits d'origine étrangère qui ont été modifiés dans leur forme ou augmentés de valeur par l'industrie canadienne, comme le sucre raffiné au Canada après y avoir été importé brut, la farine extraite de blé importé et les articles construits ou fabriqués avec des matériaux importés.

La valeur des produits canadiens exportés est leur valeur actuelle aux ports du Canada d'où ils sont expédiés, au moment de leur exportation.

*Réexportations: Evaluation*—Les «produits étrangers» exportés englobent toutes les marchandises réexportées par le Canada, après avoir été importées (entrées pour la consommation).

La valeur de ces produits étrangers est le coût effectif de ces marchandises.

*Pays auxquels le commerce est attribué:* Les importations sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables.

Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent telles importations comme venant du Royaume-Uni.

Les exportations sont attribuées au pays de l'ultime destination, c'est-à-dire le pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays d'ultime destination est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

*Ports*—Les tableaux des importations et des exportations aux différents ports d'entrée, qui figurent dans ce rapport, indiquent que ces marchandises sont passées par ces ports, soit à l'entrée, soit à la sortie, mais ne signifient pas qu'elles aient été consommées dans ces ports, ni qu'elles y eussent eu leur origine.

---

Les initiales «n.a.é.» signifient «non autrement énuméré».

---

*Energie électrique*—La valeur de l'énergie électrique importée et exportée est comprise dans les totaux du rapport du Commerce du 1er avril 1928.
